

ALT TOP

PRODUCT WITH SPECIFIC ACTION
Inoculation of mycorrhizal fungi

PERMITTED IN ORGANIC FARMING

BIO AGRONOMIC PROPERTIES

ALT TOP contains a pool of microorganisms that, by rebalancing the microbial flora present in the plant, allow an optimal development, and activating an increase in natural defenses and therefore resistance to attacks by biotic and abiotic pathogens. These microorganisms have a predominant antagonistic action towards the pathogen, protecting the health of the plant and fruit.

FINAL RESULT

- Natural resistance to fungi and pathogenic bacteria.
- Improvement of the state of well-being of the plant.
- Reduction of stress from pathogenic attacks.
- Advance and qualitative increase of production.
- Fruit and vegetables without residue.

DOSES AND METHODS OF USE

Type of application: FOLIAR

Can be used on all crops:

TREE (Pomaceae, drupaceous, actinidia, citrus and olive): 2-2,5 Kg/Ha.

HORTICULTURE: 2-3 Kg/Ha

NURSERIES: 2 to 4 Kg/Ha

Should be used in the final phase of treatments, approx. 40-50 days before harvest, with scheduled applications. Also reduces the presence of residual phytosanitary agents.

HAS NO PRE-HARVEST INTERVALS AND LEAVES NO RESIDUE

APPLICATIONS • It should be repeated 5-7 days after the previous treatment or as soon as the conditions are created.

It has no shortage time and leaves no residue.

It is advisable to distribute the product in the coolest hours of the day with the addition of LECITINA.

WARNINGS • *The product is miscible with most pesticides, excluding copper. However, it is necessary, in any case, to perform a test before application. The manufacturer is not liable for damage caused by improper use of the product.*

COMPOSITION:

Type of organic conditioner:
simple, non-composted plant
conditioner

- Mycorrhiza content 0.1 %
- Bacterial content of rhizosphere
 1×10^7 UFC/g

Raw material: Inoculum of
mycorrhizal fungi

FORMULATION

LIQUID

PACKAGING

5 - 10 kg
