

AKAR K

SIMPLE MINERAL FERTILIZER
Solution Of Potassium Salt B.T.C

BIO-AGRONOMIC PROPERTIES

Potassium plays a fundamental role in plant nutrition. Its main property is the ability to synthesise sugars, thus forming scents and flavours, and giving fruit and vegetables their colour.

It is directly involved in plant transpiration because it controls the opening of the stomas on the leaves.

Potassium improves the condition of plants during periods of stress, such as stress due to heat and fungal disease.

The use of AKAR K is recommended before fruits and vegetables begin to ripen, so that sugars can accumulate.

This product is non-phytotoxic.

Treat the plant during the coolest times of the day to avoid burning the leaves.

Mechanical action on the insect, it creates burns in the paws and in the nutritional apparatus.

DOSES AND METHOD OF USE

Type of application: FOLIAR

Can be used on all crops:

GRAPEVINE: 3 - 6 Kg/Ha

TREE (Pomace, drupaceous, Actinidia, citrus and olive): 3 – 6 Kg/Ha.

HORTICULTURE: 3 - 6 Kg/Ha

NURSERIES: 3 to 4 Kg/Ha

GREENHOUSE: 300-400 g/1000 sq m.

CEREALS (Corn, Soia etc): 3 to 6 kg/Ha

HAS NO PRE-HARVEST INTERVALS AND LEAVES NO RESIDUE

The product can be mixed with most pesticides, except for products containing copper or antibacterial agents. However, a test must always be run before product is applied. The manufacturer is not responsible for damage caused by improper use.

IMPORTANT

H 302 Harmful if swallowed. H319 Causes serious eye irritation. H335

May irritate the respiratory tract. H315 Causes skin irritation.

P264 Wash hands thoroughly after use. P280 Wear protective gloves and clothing and protect the eyes and face. P304-P340 If inhaled, move the victim outdoors. P403-P233 Keep container tightly sealed and in a well-ventilated area. Contains potassium carbonate.

SHAKE WELL BEFORE USE

COMPOSITION

Potassium oxide (K₂O) soluble in water 12%

Raw Material: BTC Potassium Salt Solution

PACKAGE

1 – 3 kg
