

SPECIALTHERM

PRODUCT WITH SPECIFIC ACTION
FILTERED SOLUTION OF SEAWEED CREAM

ALLOWED IN ORGANIC FARMING

PROTECTS CROPS FROM FROST

BIOAGRONOMIC CHARACTERISTICS

SPECIALTHERM is a liquid product that, applied to the leaf, produces a gas-permeable flexible membrane that slows down the loss of water in moments of stress of the plant (temperature changes). The colorless and odorless membrane reduces water losses protecting the plant from sudden temperature changes.

Repeat the treatment to ensure the protection of newly formed vegetation .

DOSES AND METHOD OF USE

Application type: FOLIAR

On all crops: dosage 4-5 kg/ha.

Apply the product 12-24 hours before the expected frosts.

SPECIALTHERM should be distributed alone or recommended with amino acids.

The product is biodegradable within 48-72 hours after treatment. Always test before application.

The manufacturer is not liable for damage caused by improper use of the product.

WARNINGS

Use only in case of recognized need.

Do not exceed appropriate doses.

Do not swallow, keep out of reach of children and pets.

Store at temperatures between 4° and 35°.

The product is stable at ordinary temperatures and pressures.

The product is not combustible.

Do not disperse the container in the environment.

COMPOSITION

- Organic carbon (C) of biological origin 0.2%
- Mannitol 0,7 gr/l

PACKS
10-25 kg
