

VIR TOP

ORGANIC NITROGEN FERTILIZER
Fluid yeast extract containing brown algae

ADMITTED IN ORGANIC FARMING

BIO-AGRONOMIC PROPERTIES

VIR TOP is an innovative fertiliser that activates the metabolic mechanisms in plants. It is obtained through an exclusive process, and its brown algae extracts and vitamins activate the immune system in plants.

Free laevorotatory amino acids and sugars help the plant produce its own, natural, self-defensive substances. VIR TOP can be used in every phenological phase. In particular, applications before blooming promote development into fruit.

In this formulation, the vitamins in the algae can rapidly stimulate and develop apical meristems and thus create greater plant resistance to virosis attack and a predisposition for living with virosis.

VIR TOP can be used in all phenological phases, in particular pre-flowering applications favor fruit set. In algae there is the presence of vitamins able to quickly develop and stimulate the apical meristems, creating in the plant greater resistance to the attacks of virosis and a propensity to coexist with it.

DOSES AND METHOD OF USE

Type of application: FOLIAR/RADICAL

• In Prevention:

3 kg/ha radical (before the critical phase repeat after 8 days)

3 kg/ha foliar (before the critical phase repeat after 8 days)

• At the first manifestations 6 kg/ha radical + 6 kg/ha foliar.

From vegetative awakening (arboreal), or after transplantation (horticultural) in order to stimulate the plant.

APPLICATIONS

The product should be applied by foliar with traditional interventions, it is advisable to avoid the central hours of the day.

WARNINGS • *The product can be used with most crop protection products excluding copper. It is however necessary, in any case, to perform a test before application. The manufacturer is not liable for damage caused by improper use of the product*

COMPOSITION

- Organic nitrogen (N): 1%
- Organic carbon (C) of biological origin: 10%
- pH = 6
- Organic matter with molecular weight <50 kDa: 30%

Raw materials: liquid yeast extract containing brown algae obtained by extraction with water or an acid and/or alkaline solution

PACKAGE

6 – 12 kg
