

BIOSEC

MIXTURE OF AMINO ACIDS AND VINEGAR

PERMITTED IN ORGANIC FARMING

BIO-AGRONOMIC PROPERTIES

BIOSEC is a special mixture of amino acids (of animal and vegetable origin) and Acetobacter bacteria, which produce acetic acid. Working in synergy with the amino acids, the bacteria and acetic acid exert a caustic action on the cell walls in plants.

This action dries out any plant tissue that comes into contact with the product. BIOSEC has no negative effect on biological activity in the soil, and will not affect plants when product strikes woody tissue.

DOSES AND METHOD OF USE

Private use: 20 l + 80 l of water (20% solution)

BIOSEC does not have the properties of a fertiliser (as defined in Ital. Legis. Decree 75/2010) or a phytosanitary agent (as defined in EC Regulation 1107/2009).

Authorisation not required, as per Ital. Ministerial Decree no. 18345 dated 27 November 2009.

HAS NO PRE-HARVEST INTERVALS AND LEAVES NO RESIDUE

IMPORTANT

H314 Causes serious skin burns and eye damage. Caution warnings: P264 Wash hands thoroughly after use. P280 Wear protective gloves and garments, and protect eyes and face. P304+P340 IF INHALED: move victim outdoors and keep immobile in a position that facilitates respiration. P310 Contact a POISON CONTROL CENTRE/a doctor immediately. Contains: ACETIC ACID. Store at a temperature of 4°C to 35°C. Keep out of the reach of children. Dispose of container responsibly. - This product is non-combustible and stable at ordinary temperatures and pressures.

COMPOSITION

- Nitrogen of natural origin: 1%
- Organic matter of biological origin: 20%

- Acetobacter acetic acid bacteria (vinegar) >30%

Raw materials: Mixture of fruit, grains and amino acids of animal and vegetable origin.

All raw materials are approved for use in organic farming

PACKAGE

1 – 5 – 20 kg
